

GREENCROP EXHAUST PRIMING

GREENCROP AUTOMATIC EXHAUST PRIMING

-  IRRIMEC HOSEREEL IRRIGATORS
-  LINEAR IRRIGATION SYSTEMS
-  ACOUSTIC DIESEL PUMPS
-  STANDARD DIESEL PUMPS
-  ALUMINIUM MAINS & FITTINGS

“The worst job in the irrigation season and the one task Guaranteed to make even the calmest of us bad-tempered is priming the irrigation diesel pump by hand!”

Many of our customers report that the best investment they have made in irrigation equipment is the fitting of a Greencrop Exhaust Priming Kit to their diesel pump sets.

SIMPLE TO FIT ~ EASY TO USE

The Greencrop Exhaust Priming Kit is complete and includes a new high performance silencer with the exhaust venturi fitted.

A lever assembly makes it easy to engage and disengage the automatic priming.

The Greencrop Exhaust Priming Kit comes with full instructions and is easy to fit to existing pumps.

The average time for stress-free priming is about 20 seconds!

The Greencrop Exhaust Priming Kit can be mounted with the silencer either vertical or horizontal.

We have hundreds of satisfied customers! The fitting of these kits is an ideal job for Autumn.
