GREENCROP IRRIGATION

www.greencrop.co.uk

Specially formulated for animal manure and digestate matter from biogas plants, SEPCOM® is simple, reliable, efficient and economical.

Re-using slurry offers enormous advantages in terms of transportation, storage, cleanliness and energy saving.

Separating solids from the liquid in the slurry is THE ANSWER TO THE URGENT ISSUE OF NITRATES AND PHOSPHATES ENTERING THE GROUNDWATER.

PATENT PENDING

PATENT PENDING

Feeder: compensating buffer

PATENT PENDING

Diaphragm outlet:
self-adjusting back pressure

Possibility to add more accessories

LIQUID PHASE

- Easy to spread, mix and pump
- Minimum residual sedimentation or incrustation
- Can be used for washing out sheds and pens
- Excellent for fertigation
- Reduced odour
- Reduced space requirement for slurry tanks

Flushing

Fertigation

SOLID PHASE

- Odourless
- Can be shoveled, easy to store and convey
- Can be used as bedding for cattle
- Organic fertilizer
- Product can be marketed
- Self-composting product

Can be shoveled, easy to transport and store even in enclosed spaces

Ideal cattle bedding

Product can be marketed
